

Area overview profile for Adel and Wharfedale ward, using GP data

This profile presents a high level summary of GP record data sets for the Adel and Wharfedale ward, using closest match Middle Super Output Areas (MSOAs) to calculate the area.

All wards are ranked to display variation across Leeds and this one is outlined in red.

If the ranked wards are significantly above or below the Leeds rate then they are coloured as a dark grey bar, otherwise they are shown as white to indicate they are not significantly different to Leeds.

Leeds overall is shown as a horizontal black line, Deprived Leeds* (or the most deprived fifth**) is an orange dashed horizontal. The MSOAs that make up this ward are overlaid as red circles and often range widely.

The GP data charts show all 33 wards in rank order by directly standardised rate (DSR). DSR removes the effect that differing age structures have on data, and allow comparison of 'young' and 'old' areas. GP data can only reflect those patients who visit their doctor. Certain groups within the population are known to present late, or not at all, therefore it is important to remember that GP data is not the whole of the picture. This data includes all Leeds GP registered patients who live within the ward. However, some areas of Leeds have low numbers of patients registered at Leeds practices; if too few then their data is excluded from the data here. Obesity here is the rate within the population who have a recorded BMI.

*Deprived Leeds: areas of Leeds within the 10% most deprived in England, using the Index of Multiple Deprivation. **Most deprived fifth, or quintile of Leeds - divides Leeds into five areas from most to least deprived, using IMD2015 LSOA scores adjusted to MSA2011 areas using mid-2012 GP registered population weighting.
