

Health profile overview for Bramley and Stanningley ward

This profile presents a high level summary of health related data sets for the Bramley and Stanningley ward.

This ward has a GP registered population of 25,024 with the majority of the ward population living in the mid range of deprivation. In Leeds terms the ward is ranked near the top of the city for deprivation.

The age profile of this ward is similar to Leeds, but with slightly fewer young adults.

About deprivation in this report

Deprivation throughout England is measured using the Index of Multiple Deprivation (IMD). The IMD is the result of analysis in seven 'domains': Income, employment, education, health, crime, barriers to housing & services, and living environment. The IMD provides a score for every part of England and we use this in Leeds to determine which areas of Leeds are most deprived.

Leeds is divided into five groups from the most deprived fifth of Leeds the "deprived fifth", to the least. Because this divides Leeds by MSOAs, it is a slightly generalised and removes detail in very small areas.

Ward deprivation scores take IMD scores for small areas, and weights them using population size in mid 2018. The result is like an average deprivation score for the ward area but giving greater weight to those areas with more residents.

GP recorded ethnicity, top 5 in ward	% Ward	% Leeds
White British	87.5%	70%
Other White Background	5.9%	10%
Black African	1.5%	3%
Other Ethnic Background	1.2%	2%
White Irish	0.4%	1%

(GP ethnicity data January 2019, does not contain unknowns, blanks etc)

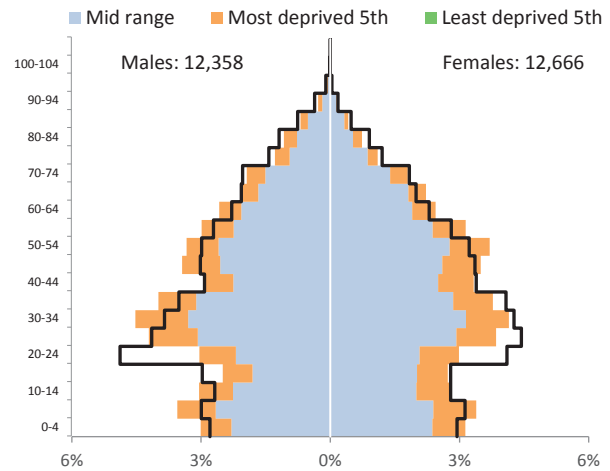

Pupil ethnicity, top 5 in ward	Ward	Ward %	% Leeds
White British	3,313	82%	65%
Any other white background	200	5%	5%
Black African	106	3%	5%
White and Black Caribbean	76	2%	2%
Any other mixed background	66	2%	2%

(Pupil data from January 2018 School Census)

Pupil language, top 5 in ward	Ward	% Ward	% Leeds
English	3,682	91%	79%
Polish	88	2%	2%
Other than English	84	2%	1%
Portuguese	29	1%	1%
Russian	14	0%	0%

Population age structure: 25,024 in total

Comparison of ward and Leeds age structures January 2019. Leeds as outline, ward shaded.

Deprivation in this ward

Proportions of this population within each deprivation fifth of Leeds. January 2019.

All wards by deprivation score

Wards are scored taking into account the numbers of people and the levels of deprivation where they live, the higher the score the more deprived the ward population.

Child obesity - reception classes and year 6 classes in 2016/17

Rates of children who are overweight or obese as provided by the National Child Measurement Programme (NCMP). The data shows children by ward of residence as a proportion of all children in the ward. The wards are ranked in descending order of deprivation score and this ward is outlined in red. Because the wards are ranked by deprivation it is possible to see a fall in rates from left to right - the least deprived wards tend to have lower rates of child deprivation.

Looked after children

Number of looked after children in wards from 2016-17, by location before being taken into care. Those within the most deprived fifth of Leeds are shown in orange. 14 of the 641 looked after children who are resident inside the most deprived fifth of Leeds are within this ward.

The wards are shown ranked by deprivation and despite variations in population sizes the general picture shows larger counts in more deprived areas.

Job seekers allowance

Counts of adults receiving Job Seekers Allowance in November 2018.

The wards are ranked by levels of deprivation and despite variations in population size and structure, there is a clear reduction in numbers as deprivation falls.

Progress8

Progress8 scores for Leeds Childrens Clusters in descending order (2016-17). Clusters that overlap significantly with this Ward are highlighted.

A School Cluster's Progress8 score is usually between -1 and +1. A score of +1 means that pupils attending schools in that cluster achieve one grade higher in each qualification than other similar pupils nationally. A score of -1 means they achieve one grade lower.

Progress 8 scores measure the schools within the cluster, not the students living inside the cluster.

GP recorded conditions, October 2018 (age standardised rates per 100,000)

These charts show all 33 wards in rank order by directly age standardised rate (DSR). DSR removes the effect that differing age structures have on data, and allow comparison of 'young' and 'old' areas. GP data can only reflect those patients who visit their doctor. Certain groups within the population are known to present late, or not at all, therefore it is important to remember that GP data is not the whole of the picture. This data includes all Leeds GP registered patients who live within the ward. The small areas (MSOAs) within wards are overlaid as red dots and often differ widely.

Obese smokers (adults for whom both records were updated within 12 months)

These charts show the number of obese smokers in this ward, by gender and deprivation levels.

Any patients living in the most deprived fifth of Leeds are shown in orange. There have always been large numbers in more deprived areas.

Women (who are more likely to be clinically obese) outnumber men in this group.

Life expectancy at birth, 2014-16 ranked wards

(years)	Males	Females
Ward	78.0	82.5
Leeds resident	79.1	82.7
Deprived Leeds*	74.4	79.0

The relationship between deprivation and life expectancy is well established and can be seen clearly here.

Life expectancy at birth, 2014-16. Ranked by deprivation

The most deprived wards are shown first, deprivation falls from left to right and the line indicates a linear trend of improvement as deprivation falls. Male life expectancy shows a greater relationship with deprivation - the trend line is steeper.

All cause mortality - under 75s, 2012-16 ranked wards

(DSR per 100,000)	All	Males	Females
Ward	470	543	397
Highest MSOA in ward	620	675	570
Lowest MSOA in ward	345	368	252
Leeds resident	356	427	286
Deprived fifth	562	668	449

DSR - Directly Standardised Rate removes the effect that age structures have on data, allows comparison of 'young' and 'old' areas

Cancer mortality - under 75s, 2012-16 ranked wards

(DSR per 100,000)	All	Males	Females
Ward	191	212	172
Highest MSOA in area	232	277	204
Lowest MSOA in area	136	153	117
Leeds resident	147	164	133
Deprived fifth	203	225	181

Circulatory disease mortality - under 75s, 2012-16 ranked wards

(DSR per 100,000)	All	Males	Females
Ward	115	156	74
Highest MSOA in area	151	221	96
Lowest MSOA in area	56	55	56
Leeds resident	82	113	52
Deprived fifth	141	188	94

Respiratory disease mortality - under 75s, 2012-16 ranked wards

(DSR per 100,000)	All	Males	Females
Ward	49	45	53
Highest MSOA in area	95	95	94
Lowest MSOA in area	22	21	15
Leeds resident	32	35	29
Deprived fifth	64	73	55

Ordnance Survey PSMA Data, Licence Number 100050507, (c) Crown Copyright 2011, All rights reserved. Mortality data copyright (c) 2016, re-used with the permission of the Health and Social Care Information Centre / NHS Digital. All rights reserved. GP data source: Leeds GP data extraction programme, only includes Leeds registered patients who are resident in the city. * 'Deprived Leeds' is an alternative definition of deprivation in Leeds - it is those areas that fall into the most deprived 10% of England, and is used when the 'Deprived fifth' can not be calculated for a dataset.

Data appendix for GP recorded conditions

Bramley & Stanningley ward

GP recorded conditions data is available for relatively small areas called MSOAs - they are combined in this report to ward areas. The charts for the GP recorded condition indicators include the MSOAs as small red dots to illustrate the variation that can occur within an area the size of a ward.

The tables below give the October 2018 rates for the MSOAs making up this ward - these are the rates displayed as red dots in the GP conditions charts. The MSOA names are nationally awarded. All rates here are age standardised per 100,000 meaning age is not a factor in any differences.

Asthma (under 16s)

			Leeds:	6,285.8
