Health profile overview for Farnley and Wortley ward

This profile presents a high level summary of health related data sets for the Farnley and Wortley ward.

This ward has a GP registered population of 26,057 with the majority of the ward population living in the second most deprived fifth of Leeds. In Leeds terms the ward is ranked near the top of the city for deprivation.

The age profile of this ward is similar to Leeds, but with slightly fewer young adults.

About deprivation in this report

Deprivation throughout England is measured using the Index of Multiple Deprivation (IMD). The IMD provides a score for every part of England and we use this in Leeds to determine which areas of Leeds are most deprived.

Leeds is divided into five groups from the most deprived fifth of Leeds the "deprived fifth", to the least. Because this divides Leeds by MSOAs, it is a slightly generalised and removes detail in very small areas.

Ward deprivation scores take IMD scores for small areas, and weights them using population size in 2019. The result is like an average deprivation score for the ward area but giving greater weight to those areas with more residents.

## Population age structure: 26,057 in total

Comparison of ward and Leeds age structures July 2020. Leeds as outline, ward shaded as follows to indicate ward resident proportions living in the most deprived 5th of Leeds, mid range, least deprived 5th of Leeds.

Females: 13,089   Males: 12,968
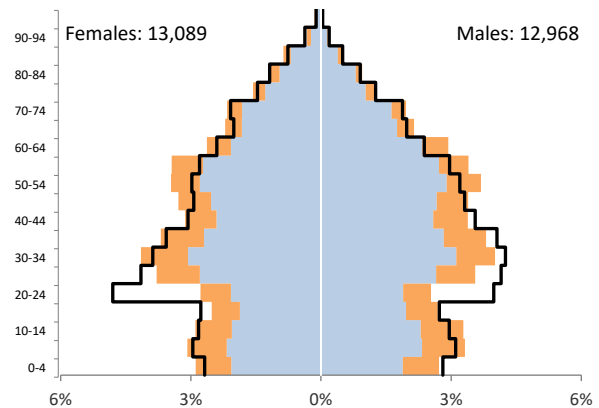

Deprivation in this ward

Proportions of this population within each deprivation fifth of Leeds. July 2020.

| Most deprived fifth	2nd most	mid	2nd least	Least deprived fifth
24%	48%	28%	0%	0%
All wards by deprivation score

Wards are scored taking into account the numbers of people and the levels of deprivation where they live, the higher the score the more deprived the ward population.

| Ward	Score
Burmantofts & Richmond Hill	58
Gipton & Harehills	56
Killingbeck & Seacroft	52

Child obesity - reception classes and year 6 classes in 2018/19

Rates of children who are overweight or obese as provided by the National Child Measurement Programme (NCMP). The data shows children by ward of *residence* as a proportion of all children in the ward. The wards are ranked in descending order of deprivation score and this ward is outlined in red. Because the wards are ranked by deprivation it is possible to see a fall in rates from left to right - the least deprived wards tend to have lower rates of child deprivation - more noticeable in Year 6.
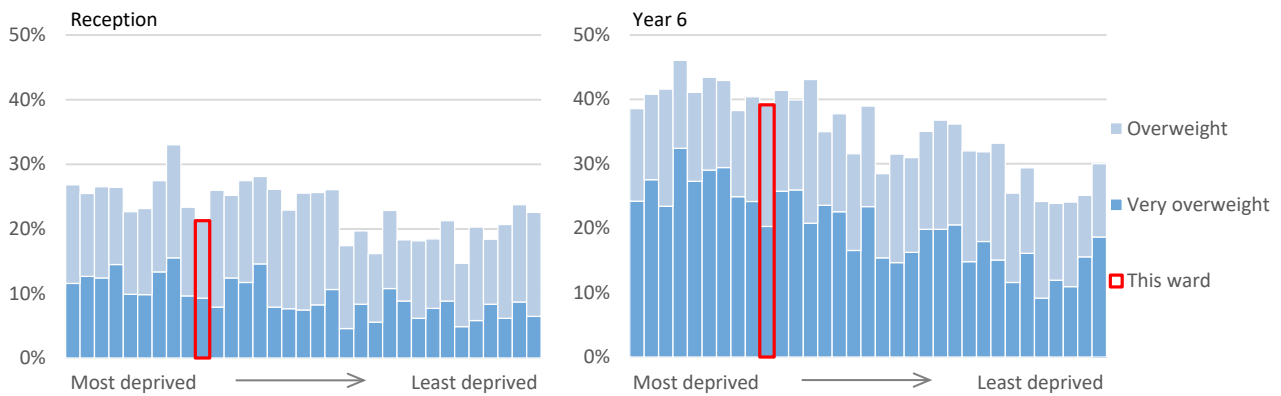

Looked after children
Number of looked after children in wards in July 2020, by location before becoming looked after. Wards are ranked from most to least deprived.
The wards are shown ranked by deprivation and despite variations in population sizes the general picture shows larger counts in more deprived areas.

KS4 % achieving a strong pass in English and Maths
Percentage of pupils achieving a strong pass (grades 9-5) in English and maths at Key Stage 4. Wards are ranked from most to least deprived, and rates are based on pupil home address, not their school address. *Data from 2018/19 academic year.*

UC and JSA claimants as % of 16-64 year olds

Universal Credit and Job Seekers Allowance claimants as a proportion of residents aged 16-64. *August 2020*

The wards are ranked by levels of deprivation and, there is a clear reduction in proportions of claimants as deprivation falls.

## GP recorded conditions, April 2020 (age standardised rates per 100,000)

These charts show all 33 wards in rank order by directly age standardised rate (DSR). DSR removes the effect that differing age structures have on data, and allow comparison of 'young' and 'old' areas. The small areas (MSOAs) within wards are overlaid as red dots and often differ widely. This data includes all Leeds GP registered patients who live within the ward.

How to read these charts

Red wards are *significantly higher* than Leeds

White wards are *not* significantly different to Leeds

Red dots are areas making up this ward (MSOAs)

Deprived

Leeds

THIS ward is outlined in red
Green wards are *significantly lower* than Leeds

GP data can only reflect those patients who visit their doctor. Certain groups within the population are known to present late, or not at all, therefore it is important to remember that GP data is not the whole of the picture.

Asthma (under 16s)

Farnley and Wortley Ward 2020.pdf

Life expectancy at birth, 2017-10 ranked wards

| (years)	Males	Females
Ward	77.5	81.2
Leeds resident	78.4	81.7
Deprived Leeds*	73.8	77.0

Life expectancy at birth, 2017-19. Ranked by *deprivation*

The relationship between deprivation and life expectancy is well established and can be seen clearly here.
The Least deprived wards are shown first, deprivation rises from left to right and the line indicates a linear trend of decline as deprivation rises. Male life expectancy shows a greater variation with deprivation - the trend line is steeper.
All cause mortality - under 75s, 2015-19 ranked wards

| (DSR per 100,000)	All	Males	Females
Ward	413	505	320
Highest MSOA in ward	678	837	517
Lowest MSOA in ward	345	395	288
Leeds resident	359	429	289
Deprived fifth	560	660	452

DSR - Directly Standardised Rate removes the effect that age structures have on data, allows comparison of 'young' and 'old' areas

Cancer mortality - under 75s, 2015-19 ranked wards

(DSR per 100,000)	All	Males	Females
Ward	156	171	141
Highest MSOA in ward	248	291	204
Lowest MSOA in ward	121	122	120
Leeds resident	141	157	128
Deprived fifth	201	220	183

Circulatory disease mortality - under 75s, 2015-19 ranked wards

(DSR per 100,000)	All	Males	Females
Ward	97	151	42
Highest MSOA in ward	159	248	67
Lowest MSOA in ward	70	98	32
Leeds resident	79	108	51
Deprived fifth	133	173	89

Respiratory disease mortality - under 75s, 2015-19 ranked wards
(DSR per 100,000)	All	Males	Females
Ward	36	46	25
Highest MSOA in ward	70	103	47
Lowest MSOA in ward	17	27	7
Leeds resident	30	32	28
Deprived fifth	60	63	54

GP recorded conditions data is available for relatively small areas called MSOAs, many of the charts in this report also display the MSOAs *within* this ward as small red dots to illustrate the variation that can occur within an area the size of a ward. The tables below give the April 2020 rates for the MSOAs making up this ward.

All rates here are age standardised per 100,000 meaning age is not a factor in any differences.

Asthma (under 16s)
